

*Ever pinch your fingers using a Pull Tester's spring scale?*

*Ever tried using a Pull Tester in a tight access area?*

*Ever send the steel ball sailing across the room?*

*No such problems with the*

# GAUSSMETER

Shown 3/4 actual size

This simple instrument allows you to easily measure magnetic strength without hassles. Makes HACCP (Hazard Analysis Critical Control Points) compliance a snap. Place the probe at the point of maximum magnetism and read the meter. IT'S THAT EASY! It comes with everything you need - instructions, a piece of special paper that allows you to quickly locate the places of maximum magnetism, a screwdriver to remove the backplate, should you ever need to replace the battery. It is powered by a replaceable 9V battery and has a 48" flexible probe.
