

The selector switches described below can accept up to 12 separate signals from either thermocouples or 3-wire RTD sensors. The switches allow the user to select and feed any one of the input signals into a single channel indicator or recorder, thus in effect, making the instrument a multipoint instrument.

1/4 Din Selector Switch Model #42-10000

1/8 Din Selector Switch Model #42-11000
