

16" Ultra Hygiene Squeegee

Series 7140

Improved Hygiene

Smooth and rounded surfaces minimize pooling water and food soils

Prevent Over-tightening

Tap inside thread prevents over-tightening of the handle when mounted

Improved Rubber Blade

Increased flexibility of blade conforms to surfaces for more efficient cleaning

Updated Body Design

Elongated on ends to protect the rubber blade and guards against splashes

This is a one-piece, single-blade squeegee with an ultra-hygienic design that minimizes areas for water and food soils to collect.

16" Ultra Hygiene Squeegee

7140

Ideal for removing water or food debris from floors and food contact surfaces, and especially effective in areas requiring the highest level of hygiene. A splash guard helps prevent water from reaching the dried surface.

The Color-Coding System

Remco and Vikan® brands offer an integrated color-coding system to help mitigate the risk of cross-contamination in food processing facilities. With an array of color-coded tools and storage brackets, and years of experience building effective color-coding systems, the experts at Remco Products Corporation can help you effectively apply color-coding to divide and identify different zones or processing tasks. As a result, workers can more easily comply with material handling and hygienic cleaning procedures to maintain stringent food safety standards.
